Enter each child according to the grade in which he is enrolled, and his age as of his last birthday on or before September first. Begin with the first grade. Find how many are 5 years old, 6 years old, 7 years old, 8 years old, etc., and enter in the proper column. B denotes boys, G denotes girls, and T denotes total. All those above the heavy lines are under age, all those between the heavy lines are normal, and those below are over age. For example, in the third grade all those under 8 are under age, and all those 10 years of age or over are over age. Be sure that the number listed above for each grade and for each age is the same as the number enrolled for that grade and for that age. The numbers enrolled are to be taken as R+S (see "Source of Enrollment"). This will give an age-grade distribution for the whole state, excluding duplicates. Do not count any except those enrolled the first time in school this year, and those enrolled by transfer from another state. Pupils transferred from other schools will be reported by the school from which they came. Pupils which leave your school will be reported by you, no matter where they transfer to.

Enter pupils according to the number of years they have been in school, including this year, and the grade in which enrolled on September first. For example, find the number in the second grade who have been in school one year, three years, etc., and enter in the proper column. Those who are in the second grade their first year are rapid in progress, those who are in school for their second year are normal, and those who are in their third year or more are slow in progress. All above the heavy lines are rapid, all below are slow. Be sure that the number listed in each grade and for each age is the same as the total enrolled for each grade and for each age. The numbers enrolled are to be taken as R+S (see "Source of Enrollment"). This will give an age-grade distribution for the whole state, excluding duplicates. Enter each child according to the grade in which he is enrolled, and his age as of his last birthday on or before September first. Begin with the first grade. Find how many are 5 years old, 6 years old, 7 years old, 8 years old, etc., and enter in the proper column. B denotes boys, G denotes girls, and T denotes total. All those above the heavy lines are under age, all those between the heavy lines are normal, and those below are over age. For example, in the third grade all those under 8 are under age, and all those 10 years of age or over are over age. Be sure that the number listed above for each grade and for each age is the same as the number enrolled for that grade and for that age. The numbers enrolled are to be taken as R+S (see "Source of Enrollment"). This will give an age-grade distribution for the whole state, excluding duplicates. Do not count any except those enrolled the first time in school this year, and those enrolled by transfer from another state. Pupils transferred from other schools will be reported by the school from which they came. Pupils which leave your school will be reported by you, no matter where they transfer to

Enter pupils according to the number of years they have been in school, including this year, and the grade in which enrolled on September first. For example, find the number in the second grade who have been in school one year, three years, etc., and enter in the proper column. Those who are in the second grade their first year are rapid in progress, those who are in school for their second year are normal, and those who are in their third year or more are slow in progress. All above the heavy lines are rapid, all below are slow. Be sure that the number listed in each grade and for each age is the same as the total enrolled for each grade and for each age. The numbers enrolled are to be taken as R-T-S (see "Source of Enrollment"). This will give an age-grade distribution for the whole state, excluding duplicates. Do not count any except those enrolled the first time in school this year and those enrolled by transfer from another state. Pupils transferred from other schools will be reported by the schools from which they came. Pupils which leave your school will be reported by you, no matter where they transferred to.

Enter each child according to the grade in which he is enrolled, and his age as of his last birthday on or before September first. Begin with the first grade. Find how many are 5 years old, 6 years old, 7 years old, 8 years old, etc., and enter in the proper column. B denotes boys, G denotes girls, and T denotes total. All those above the heavy lines are under age, all those between the heavy lines are normal, and those below are over age. For example, in the third grade all those under 8 are under age, and all those 10 years of age or over are over age. Be sure that the number listed above for each grade and for each age is the same as the number enrolled for that grade and for that age. The numbers enrolled are to be taken as R+S (see "Source of Enrollment"). This will give an age-grade distribution for the whole state, excluding duplicates. Do not count any except those enrolled the first time in school this year, and those enrolled by transfer from another state. Pupils transferred from other schools will be reported by the school from which they came. Pupils which leave your school will be reported by you, no matter where they transfer to.
